DATA ANALYST

Internship Task 1

Description: Cleaned and analyzed the Kaggle Netflix Shows dataset using Excel; transformed raw CSV data into a structured format and created analytical charts to visualize content trends and distributions.

Prepared by: Reema safrin M   **Prepared for: Internship**   Jan 15, 2026

My work

📊 Internship Task Description (Bullet Points)

- Collected the **Netflix Shows dataset** from **Kaggle** in CSV format
- Cleaned the dataset using **Microsoft Excel**, including:
  - Handling missing and blank values
  - Removing inconsistencies and formatting issues
  - Organizing columns for analysis (release year, rating, type, etc.)
- Converted the raw dataset into a **cleaned and structured format**
- Performed **exploratory data analysis (EDA)** in Excel
- Created visualizations such as:
  - Release of shows by year
  - Distribution of content ratings
  - Comparison of Movies vs TV Shows
- Compiled cleaned data and charts into a single **Excel dashboard-style sheet** for easy interpretation
