

DATA ANALYST

Intenship project 4

DESCRIPTION

Analyze startup investment trends using Shark Tank data by cleaning and organizing datasets, evaluating funding patterns, and studying founder success factors. Create interactive visual dashboards to present insights on industry performance, deal outcomes, and investment behavior across different domains and funding stages.

PREPARED BY

Reema Safrin M

MY WORK

Conducted a comprehensive startup investment analysis using a Shark Tank dataset by cleaning, organizing, and transforming raw data in Excel and Power BI. Performed detailed analysis on funding trends, founder experience, and industry performance across domains. Created calculated metrics such as funding gap and success rate to derive meaningful insights. Designed an interactive Power BI dashboard featuring bar charts, pie charts, line graphs, and scatter plots to visualize investment patterns and deal outcomes. Implemented filters and KPIs to enhance user interaction and decision-making. The project highlights key trends in startup funding, investor behavior, and factors influencing successful deals.

DATASET USED

[shark_tank_dataset](#)

SHARK TANK DASHBOARD

The dashboard presents startup investment insights through interactive visuals including funding by domain, deal success distribution, funding stage trends, and founder experience analysis. It features KPI indicators, filters, and dynamic charts, enabling users to explore investment patterns, compare industries, and understand key factors driving successful startup funding decisions.
